## PUBLIC CLOUD CREATING AN INSTANCE IN SALESFORCE

### AIM:

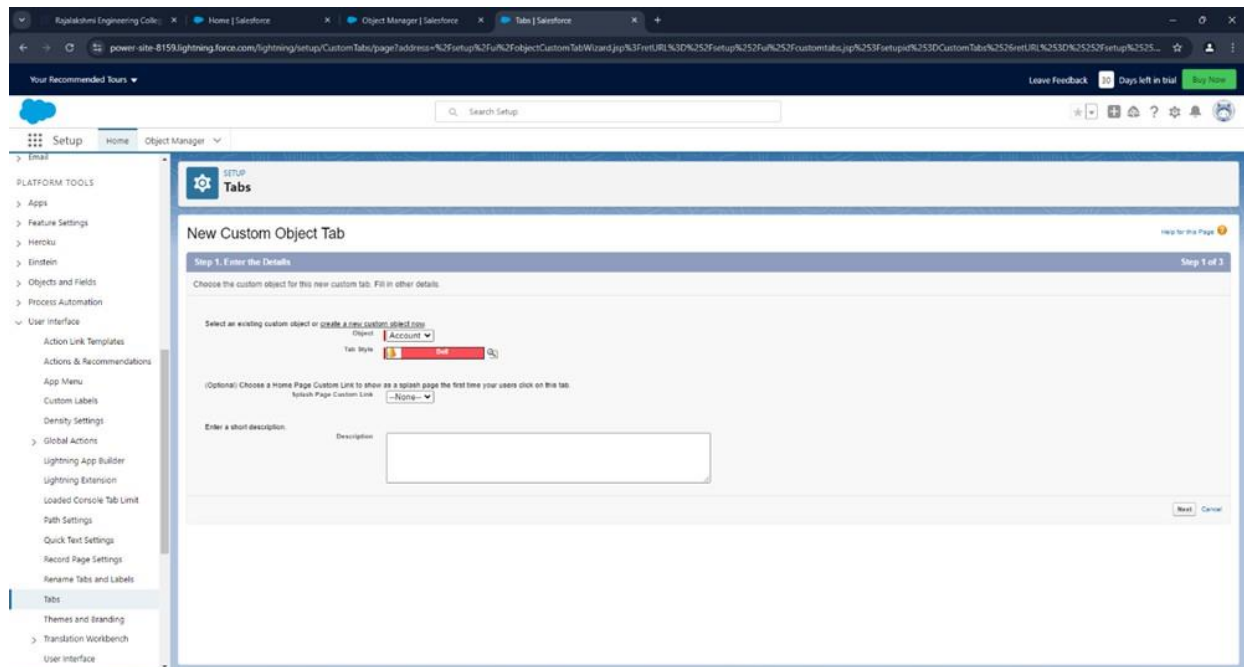

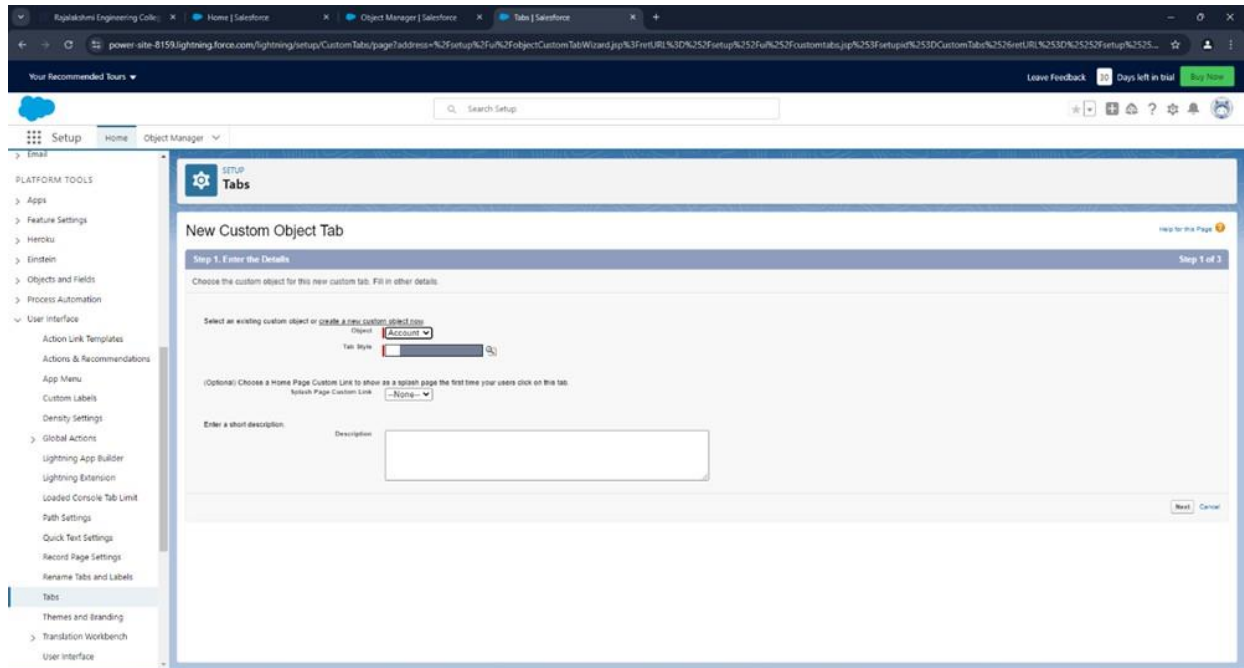

Develop a simple application to understand the concept of PAAS using Sales force

### PROCEDURE:

1. Log in to your Salesforce account.
2. Click Setup at the upper-right corner.
3. Under the Build section, click Create and select Objects.
4. To create a custom object, click New Custom Object.
5. Enter the name of the Custom Object in Label, Plural Label, and Object Name.
6. Choose the custom apps for which the new Custom tab is required and click Save.
7. Select whether you want to define a custom app or a Salesforce console.
8. Give the app a name and description. An app name can have a maximum of 40 characters, including spaces. Click Save.

### OUTPUT:

The screenshot displays the 'New Custom Object' configuration page in Salesforce. At the top, there's a navigation bar with 'Setup', 'Home', and 'Object Manager'. The main heading is 'New Custom Object'. Below this, a yellow banner states: 'Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Set permissions](#) [Get help about this message](#)'. The 'Custom Object Definition Edit' section includes a 'Save' button and a 'Save & New' button. The 'Custom Object Information' section contains fields for 'Label' (Account), 'Plural Label' (Accounts), 'Object Name' (Account), and a 'Description' text area. Below these are checkboxes for 'Starts with vowel sound' and 'Context Sensitive Help Setting'. The 'Enter Record Name Label and Format' section includes a 'Record Name' field (Account Name) and a 'Data Type' dropdown (Text). The 'Optional Features' section at the bottom has checkboxes for 'Allow Reports' (checked) and 'Allow Activities' (unchecked).

User Interface

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs
